Microchip Num:

Breed: GERMAN WIREHAIRD POINTER

Age: 18 months

Weight: 66 lbs/29.9 kgs

Date Submitted: 26 Sep 2016

Findings

Distraction Index (DI):Right DI = 0.19, Left DI = 0.19.

Osteoarthritis (OA):No radiographic evidence of OA for either hip.

Cavitation/Other Findings:None.

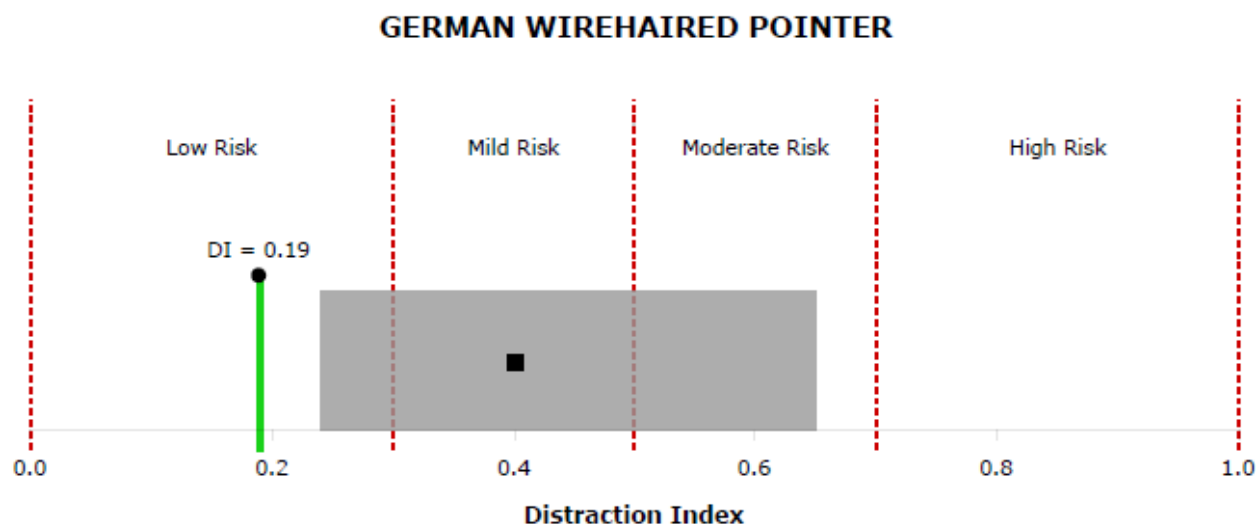

(Continued to next page)

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.19.

OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.

Distraction Index Chart:

Breed Statistics: This interpretation is based on a cross-section of 459 Canine patients of the GERMAN WIREHAired POINTER breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.24 - 0.65) for the breed. The breed average DI is 0.40. The patient DI is the solid circle (0.19).

Summary: The degree of laxity (DI = 0.19) ranks the hip within the tightest 5% of DIs for the breed. This amount of hip laxity places the hip at a minimal risk to develop hip OA. No radiographic evidence of OA for either hip.

Interpretation and Recommendations: No OA/Minimal Risk: Unlikely to show radiographic evidence of hip OA; even more unlikely to develop clinical signs of hip dysplasia. Recommendations: Normal to strenuous activity is permitted. Keep lean: try to maintain BCS at 5/9 for a longer and healthier life.

Breeding Recommendations: Please Consult the PennHIP Manual.

Comments:

Thank you for following policy and submitting 2 Distraction views when the hips appeared tight, to your eye. This helps confirm tightness.
